

CineEase

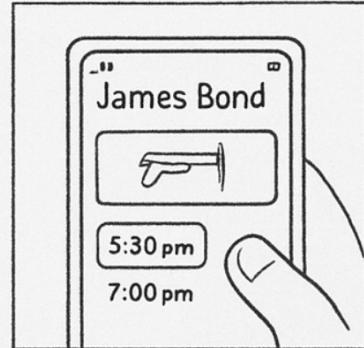

ACTIVITY 1 The CineEase Story board

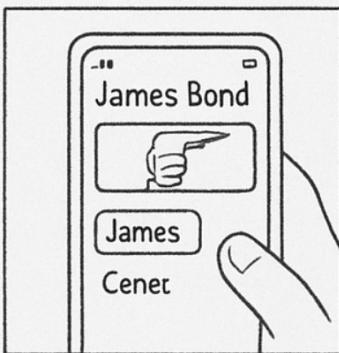

Dan opens the movie-ticket booking app

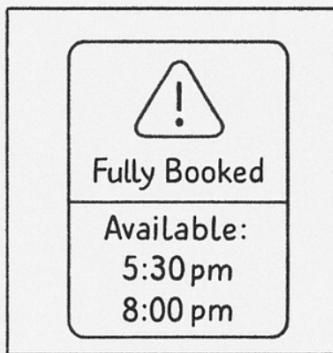

He searches for the film

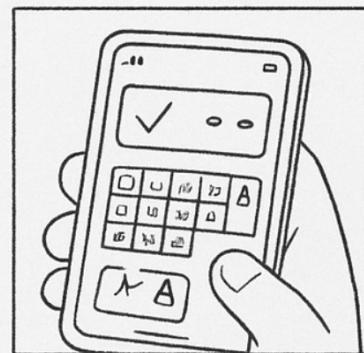

He chooses the 7:00pm showtime

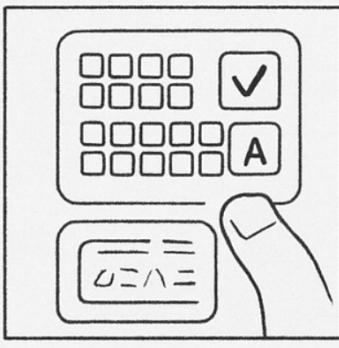

Dan selects a cinema from the results

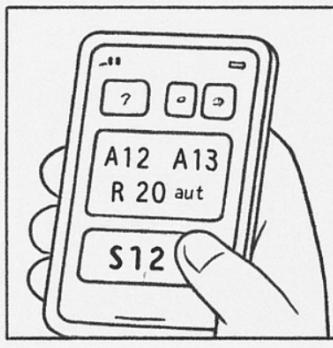

He is notified that it is fully booked

Dan selects the 8:00 pm showtime

He views the seating and pricing, and confirms hearing aid support

Dan chooses his seats

He completes the booking

ACTIVITY 2

Peer Walkthrough Notes

- Time: 1:52
- Issues: didn't see price legend, tried selecting booked seat, didn't know how to deselect
 - Accessibility: hearing-aid icon too small

HTA

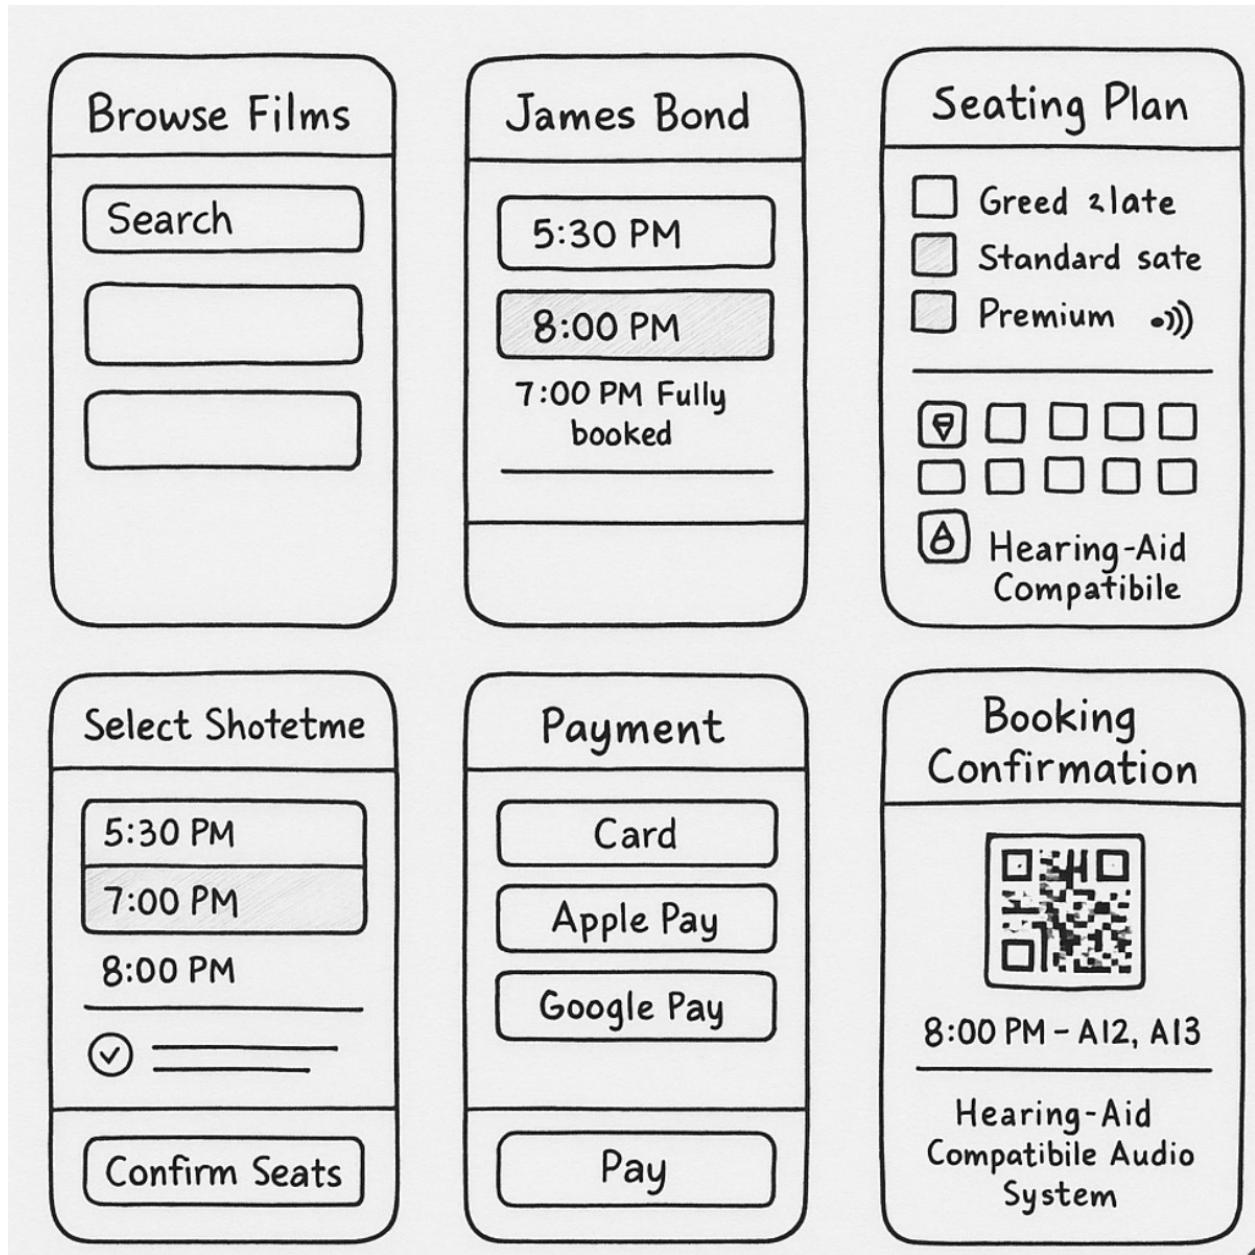

0. Book a movie ticket
 1. Search for a film
 - 1.1 Type film name
 - 1.2 Select film from results
 2. Select cinema
 - 2.1 Review showtimes
 - 2.2 Handle "fully booked" case
 - 2.3 Choose alternative time
 3. Select seats
 - 3.1 View seat map
 - 3.2 Check legend / accessibility
 - 3.3 Select/deselect seats
 4. Confirm booking
 - 4.1 Review seats
 - 4.2 Proceed to payment

4.3 Complete purchase

PLAN: Do 1 → 2 → 3 → 4

ACTIVITY 3

low fidelity prototype for cine star

The app is a movie-ticket booking app that lets users quickly search for films, choose showtimes, pick seats, and pay for tickets. It also clearly shows accessibility features—such as hearing-aid compatible audio—so users like Dan can book confidently and easily.
